

Prevention of Women's Heart Disease in the workplace and your community.....

Saint Joseph's Heart Center for Women's primary initiative is community awareness. Heart disease already affects far too many women of our society, so we would like you to join us in this campaign to fight heart disease and promote healthy lifestyles. We can offer your organization the opportunity to have a representative from Saint Joseph's Heart Center for Women provide a **complimentary community educational presentation** regarding Women and Heart Disease. These popular programs include a question and answer session with the nurse and/or doctor to address your audience's concerns. This educational program is provided at no charge and can be modified to meet your organization's needs. We want to enlist your help in reaching out to women to emphasize the importance of early detection and prevention through screenings. Our focus is helping individuals make a difference in their own lives and the lives of others.
